

In the Specification:

Please delete the paragraph that extends from page 9, line 19 to page 10, line 7 and replace with the following paragraph:

The autoconfiguration service 305 controls a PAN media-specific module 309 that is loaded by a layer 2 configuration service component 307. The media-specific module 309 abstracts away the functionality of the PAN driver 313 and provides the autoconfiguration service 305 with media-specific APIs for discovery of, attachment to and disconnecting from remote Bluetooth devices. The PAN driver 313 negotiates IP connectivity with a remote Bluetooth device. In an embodiment, the driver 313 is an NDIS miniport driver for the Microsoft ® Windows platform. The driver 313 exposes an Ethernet interface on its upper path and interacts with Bluetooth L2CAP and Baseband levels on its lower path. Certain features of embodiments of such a driver are disclosed in U.S. Patent Application Serial No. \_\_\_\_\_ (~~Attorney Docket No. 224112~~) 10/725,099, filed on the same date as the present application, having certain inventors in common with those of the present application, and having a common assignee.
